Hi Anne,

Intermax WISP operates at 2.4 GHz, and 5.8 GHz. This is the licensed spectrum for wireless internet providers. Public Safety systems operate in the 4940-4990 MHz band (4.9 GHz band), so the frequencies don't overlap and there should not be any interference issues. First Responder frequencies take precedence over commercial operators, so in the rare case where there could be some small harmonic trouble, it would be Intermax responsibility to resolve via additional filters placed at its antennas.

I have also attached updated documents correctly identifying the Adams County Sheriff's office.

Regards,

Shannon Morrelli

Shannon,  
I am getting ready to finish up the environmental review of this project. Can you provide a response to the Fire Chief's concern below?  
Thanks,

Shannon,

The Fire Chief is asking about whether the proposed tower or operation would interfere with the emergency services tower 700' to the northeast. What can you provide?

Also, several places in the documents talk about this tower as Othello Police Department, but it is actually Adams County Sheriff's Office.

Thanks,

**Anne Henning, AICP**
