

BUSPATROL

Protect Every Student in Connecticut on Their Journey to School

Each year, more than 39 million vehicles in the US unlawfully pass stopped school buses, putting millions of students at risk.

Take action against reckless passers with the nation's most deployed stop-arm enforcement solution.

A Public Safety Issue We Can't Ignore

Every student deserves a safe ride to and from school.

Bring the nation's leading stop-arm enforcement solution to your school district and curb reckless driving around school buses - keeping every student safe.

How It Works:

1

Smart Technology Installed on Every Bus

We combine AI-powered stop-arm cameras, interior cameras, and edge processing to detect violations and enhance student safety.

2

Violations Are Captured in Real-Time

When a vehicle passes a stopped school bus, the system captures real-time video and license plate data.

3

Expert Evidence Review

Every incident is reviewed before being sent to law enforcement for approval and citation.

4

Violators Are Held Accountable

Citations are mailed with a link to view video evidence and instructions to pay or contest.

5

Programs Are Violator-Funded

No upfront cost to schools or taxpayers – revenue supports community education and safety programs.
